- Active Data Network products
  (Routers, Switches, Wireless)

- Passive Data Network products
  (Cabling, Racks, Accessories, Converters & Civil work)

Smart Meeting Space

Equip your meeting rooms with the latest technologies to enhance your meeting experiences without barriers.

Contact Centre

Deliver seamless experience for your customer with our trailored solutions

IP Technology

IP Telephony solutions that use customer networks for data transfers, which eliminates extra hardware investments.

Cloud-as-a-Service

Our services are geared towards optimizing IT expenses and reducing costs, allowing organizations to concentrate on their core competencies.

Unified
Communications

- Classic telephony
- Video conferencing
- Optimized business process
- E-mail
- Voice mail
- Instant messaging
- Optimized communication
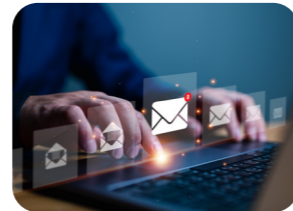

The Evolutions of Unified
Communications

Desk phones and telephony centric tools formed the foundation of UC.

Over time, more advanced phone systems emerged, as did PCs and email.

The Internet helped spawn other communication modes, including IM and video chat.

Mobile phones greatly expanded the communications landscape.

The rise of messaging and mobility presents new ways of working.

Communications platform as a service, or CPaas, embeds communications into business apps.

Artificial intelligence and voice assistants could improve meeting workflows.

Datacenter Solutions

Server & Storage Solutions

Design and implement server solutions across different platforms to serve varied application workloads.

Smart Networking

Modern connectivity for wired and wireless solutions.

Intelligent Collaboration

Modernize your workplace with latest ways to connect and collaborate.

IT Risk & Data Protection

Protect your IT Infrastructure from unauthorized access. This keeps out agents who might seek to steal or otherwise disrupt system data.

Backup, Archival & Disaster Recovery

Rapid data recovery and long-term data retention with consultation and services.

Virtualization & Consolidation

Eliminate over provisioning, increase server utilization and reduce your IT cost

Hybrid Cloud Infrastructure

Cloud solutions enable you to build and run consistently across cloud, on-premise and edge environments.

Data Center Infrastructure

Design & modernize data centers as well as migrate workload to cloud

Data
Security

A good solution is not good if security is compromised and that is why GOLDEN TECHNOLOGY is addressing this concern in an effective way to secure client investment including hardware security appliance (UTM, Firewall) and software tools (Endpoint security, analytic tools)

Light Current and physical security

- Surveillance
- Access Control and Attendance
